

### Creation of a database

- ✓ The languages used in this project are JAVA and SQL
- ✓ The project was in a group of five so we used **git** in order to manage the project and work efficiently.
- ✓ The objective of this project was to create a database for managing a fleet of self-service vehicles. And to create an application which uses a database.
- ✓ In this project I participated in the creation of the relational schema and the creation of the database. And I implement the application in java.

### Compilation and execution

To compile you can use the command in the directory JAVA:

- ✓ **make**
- ✓ the command **make exe** launch the application.
